**DETAILED ACTION**

1. Claims 1, 3 and 5-9 are rejected under 35 U.S.C. 103(a) as being unpatentable over Huber et al '003.

Note motor 20, planetary gearing 50, 55 and 60, lift 40, roller 30, first brake 90 and second brake 70. Note column 4 lines 25-30 of Huber et al state that when brake 90 brakes roller 30 the drive from motor 20 is diverted not slowed to the lift means 40. While Huber is silent as to the design (electrical, mechanical, etc.) of the first and second brake means, their designs have not been proven to be critical to the operation of the claimed system. Therefore, the design of brakes 90 and 70 are considered to be functionally equivalent to those claimed. With regard to claim 3, the need for a brake gear with the first brake is a matter of choice since the first brake in Huber et al is a functional equivalent design.

2. Claim 4 is objected to as being dependent upon a rejected base claim, but would be allowable if rewritten in independent form including all of the limitations of the base claim and any intervening claims.

3. Any inquiry concerning this communication should be directed to Joseph E. Valenza at telephone number (703) 308-2577. Amendments may be faxed to 703-305-7687. My normal workweek is Monday through Thursday.
